DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-10 and 12-19 are rejected under 35 U.S.C. 102(b) as being anticipated by Ramsburg.

Ramsburg et al. discloses a foldable data card assembly comprising: a sheet having an upper and lower surface a base portion (64) having spaced apart first and second lateral sides and spaced apart top and bottom base edges; a first lateral portion (65) extending laterally away from the first lateral side of the base portion; a second lateral portion (63) extending laterally away from the second lateral side of the base portion, a first line of weakness formed in the base portion and the first lateral portion, the first line of weakness (18) being substantially parallel to the top base edge; a second line of weakness (18) formed in the base portion and the first lateral portion, the second line of weakness being substantially parallel to the bottom base edge; and an adhesive (31) disposed on at least a portion of an area of the upper surface of the base portion intermediate the first line of weakness and the top base edge and on at least a portion of an area of the upper surface of the base portion intermediate the second line of weakness and the bottom base edge, wherein the second lateral portion is foldable along a first fold line(61) to a stowed position wherein the second lateral portion overlies

at least a portion of the upper surface of the base portion and wherein the first lateral portion is foldable along a second fold (62) line to a covering position wherein the first lateral portion overlies at least a portion of the second lateral position when the second lateral portion is in its stowed position. Ramsburg et al. further discloses indicia (25,26) and an aperture (19).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claim 11 is rejected under 35 U.S.C. 103(a) as being unpatentable over Ramsburg et al. in view of Stimson et al.

Ramsburg et al. discloses substantially all of the subject matter set forth in the claims except for indicia coated with a removable scratch-off coating, which conceals the

indicia from view. Stimson et al. discloses and teaches that it is well known in the art to use a scratch off coating to conceal indicia (see column 3, lines 44-52). It would have been obvious to a skilled artisan at the time of the invention was made to provide the card of Ramsburg et al. with the a scratch off coating which conceals the indicia from view in the manner as taught by Stimson et al. in order to add another level of security to the document.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
